BDRCloud is a comprehensive and cost-effective cloud backup software for Servers, Endpoints, Applications/DBs and SaaS Applications.. BDRCloud is a highly secure and scalable cloud solution that complies with major regulations globally.

BDRCloud for Data Center and Private Cloud

Server Backup: Protect your business critical files & folders on Windows, Linux and NAS by directly backing up to BDRCloud.

- Backup files/folders of Windows, Linux, NAS
- Retain needed files along with its versions, spanning years
- Built-in Encryption and Compression
- Restore backup data anywhere at anytime
- Optimized backup with where-it-left-off

Endpoints Backup: Backup data across Windows & Mac endpoints to ensure the data is protected from an accidental deletion or system crash by backing up them to BDRCloud.

- Files & Folders Backup for Windows, & Mac
- End-to-End Encryption of backup data
- Restore the files/folders from anywhere at anytime
- Continuous Data Protection
- Flexible Scheduling & Retention

Applications & DBs Backup: Directly backup applications such as Microsoft Exchange Server, SQL Server, Microsoft SharePoint, Microsoft Outlook & MySQL to BDRCloud.

- Backup the entire or only the selected databases
- Near Continuous Data Protection with incremental backups
- Transaction log backup
- Flexible retention policies to retain backup versions for years
- Inbuilt encryption & compression on flight and at rest

BDRCloud for SaaS Applications

Microsoft 365 Backup: Cloud-to-Cloud backup solution for Microsoft 365 Emails, Contacts, Calendars, SharePoint Online, Teams, and OneDrive data directly to BDRCloud.

- Backup entire mailbox or individual items
- Restore backup data from anywhere, anytime
- Restore to the same or different user accounts
- Export to multiple formats: PST, EML, MBOX, VCF, ICF
- AES 256- bit Encryption for data security

Google Workspace Backup: Secure cloud-to-cloud backup and recovery for Google Workspace Emails, Contacts, Calendars, Google Drive and Shared Drive directly to BDRCloud.

- Backup entire mailbox or individual items
- Restore backup data from anywhere, anytime
- Restore to the same or different user accounts
- Export to multiple formats: PST, EML, etc.
- AES 256- bit Encryption for data security

> ❝ **Customer Quotes**
>
> *We have used Vembu product for years, starting with its hybrid-cloud backup solutions and like it for its ease to deploy, ease to manage, ease to invoicing, and broad set of scalable offerings from simple file backup up to BCP product lines."*
>
> – *-Lee Wong, Manager of IT at The Mackie Group*

Supported Platforms

✓ **File Servers**
(Windows and Linux)

✓ **Endpoints**
(Windows and Mac)

✓ **Applications**
(MS Exchange, MS SQL, MS Sharepoint, MS Outlook, MySQL)

NASA · intel · motorola · c|net · SIEMENS · Mercedes-Benz · CISCO · PHILIPS

Key Differentiators

Continuous Data Protection: Backup files/folders starting from < 1 minute to Hourly/Daily/Weekly basis and store the same in BDRCloud.

Interruption-free Backup: BDRCloud intelligently resumes backups from where it left off during the last schedule after any interruption.

Unique Reverse/Forward Incremental Approach: BDRCloud exposes every incremental backup as a virtual full backup, allowing for quick recovery from any point in time without involving merge time.

Round the Clock Restore: Users can easily restore the backup data to the original or to an alternate location, from anywhere at any time.
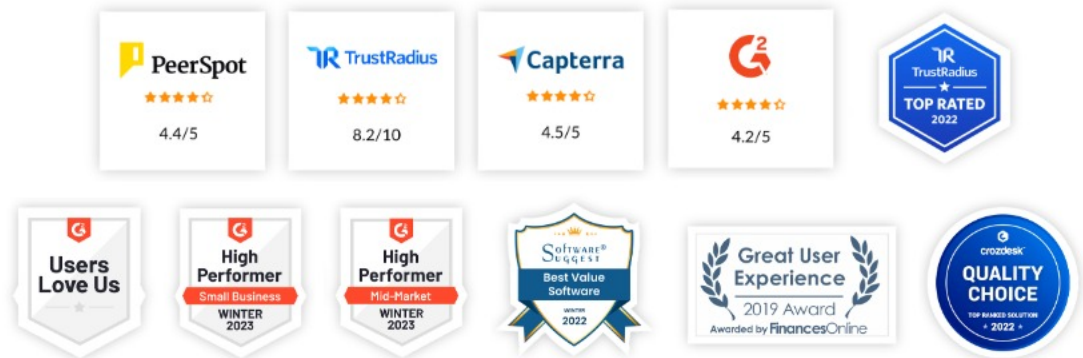

Best in class Data Retention Technology: Flexible retention policies that streamlines by removing identical blocks and reconstructing the chunks, saves time and archives the backup data for ages.

Bandwidth Throttling: Throttle the speed of the backup data transfer for a selected time to reduce the network traffic, while transferring the data over WAN.

Secured Cloud Backup over WAN: Securely backup your data, regardless of their location directly to BDRCloud. The AES-256 bit algorithm encrypts the backup data both at the flight and at rest.

Explicit Reporting with Email Notification: Reporting and notification features includes advanced reporting and notification features with timely mail alerts.

Backup software that is highly rated by customers and experts
