

#1 Cost-Effective **Windows Server Backup** for Businesses and MSPs

Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs,
SaaS, DBs/Applications, NAS/File Share

Store Backup Anywhere

On-Premise/Remote Storage,
Your Own Public Cloud, BDRCloud

Centralized Management

BDRCloud-Hosted (or) BDRSuite's
Self Hosted Management Console

BDRCloud for Windows Server Backup & Recovery

BDRCloud delivers a comprehensive and budget-friendly solution for backup and recovery, specifically designed for Windows Server environments. By streamlining and automating data protection, BDRCloud enables businesses and MSPs to address challenges like data loss, downtime, data integrity, and recovery complexities.

Supported Platforms

Windows Server 2012 & Above

Key Features

Disk-Image Backup

Backup the entire machine or specific disks or individual volumes, ensuring complete data protection.

Flexible Storage Options

Store backups on BDRCloud, or use your own public cloud like Amazon S3, Azure Blob, Google Cloud, Wasabi, Backblaze B2, MinIO, or other S3-compatible storage or On-Premises (local/remote storage).

Ransomware Protection & Recovery

Safeguard data against ransomware with immutable backups and two-factor authentication, ensuring rapid recovery from attacks.

Direct-to-Cloud Backups

BDRCloud

Utilize our reliable & secure BDRCloud Storage

Bring Your Own Cloud

Use your existing Private/Public Cloud Storage

Amazon S3 | Azure Blob | Google Cloud | Wasabi
Backblaze | MinIO | Other S3 Compatible Storage

File Level Backup

Perform granular backups such as file or folder level backup without backing up entire disk or machine.

Flexible Recovery Options

Restore the backed up Windows Servers the way you need it - entire machine, specific disk/volume, individual files/folders or application items.

Cloud-Based Management Console

Manage, configure, and monitor all backups from BDRCloud-hosted centralized console, accessible from anywhere.

Bare-Metal Recovery

Restore the entire Windows Server machine from scratch to the same or different hardware.

Incremental Backup

Leverages Resilient Change Tracking (RCT) and BDRSuite's proprietary Changed Block Tracking (CBT) to only backup changes since the last backup.

Customizable Backup Scheduling

Automate backups at intervals such as every 15 minutes, hourly, daily, weekly, or monthly, ensuring continuous data protection.

Application-Aware Backups

Guarantees consistent backups of applications like Microsoft Exchange, SQL Server, Active Directory, and more.

Retention & Compliance

Establish data retention policies to comply with regulatory requirements and organizational needs.

Secure Data Transmission

Protect data during transfer with efficient encryption, securing sensitive information from breaches and unauthorized access.

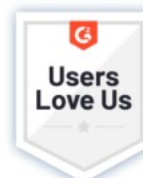

Remote Backup

Enable backup from any network or geographic location, providing flexibility for distributed environments and remote operations.

Backup Job Template

Simplify backup job creation with predefined job templates that come pre-configured, requiring only the selection of specific hosts.

Highly Rated
Backup Solution by Customers,
MSPs, Channel Partners

“

We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.
