

Cloud Backup for File Servers

Vembu offers Continuous Data Protection for the file & folders from the Windows & Linux file servers directly to Vembu Cloud. During the incremental backup schedule, only the modified files/folders will be backed up. All your data is encrypted using an AES-256 bit encryption algorithm during the transfer and at the vembu cloud storage. You can restore the backup data from anywhere at any time.

Customer Quotes

"The Vembu solution has increased Lentner Technology Integrator's bottom line for cloud backup services from \$1 per GB up to \$7 per GB. This has proved to be one of the most profitable services in our lineup offered to clients. In total, Vembu BDR has saved our clients an estimated half a million dollars in lost revenue from data loss last year."

**- Sean Lentner, CIO,
Lentner Technology Integrators**

Vembu Portal

It is an all-in-one portal to register & manage Vembu Products & Services with the options like:

- Billing
- Invoice
- Licensing
- Account Management

Key Features

Files/Folders Backup: Backup individual files and folders of Windows, Linux servers hosted in a physical/virtual environment directly to Vembu Cloud.

Mapped Network Drive Backup: Ensure Continuous Data Protection to your NAS, SAN devices by backing up the business-critical files/folders to Vembu Cloud.

Registry Backup: Using the Volume Shadow-copy Service of Microsoft, Vembu supports backup of Windows Registry settings including the user profiles.

System State Backup: Backup critical system-related components including Boot files, COM+ Class Registration database, SYSVOL directory, etc.

Retention policies : Retain any number of file versions with Version-based and Time-based retention options.

In-built Encryption: The backup data is encrypted using the AES-256 bit algorithm to protect the data both in flight and at rest.

Restore Anywhere Anytime: Restore the backup data from the Cloud BDR Client or from the Vembu Cloud at any time from anywhere.

Backup Schedule Window: Set the time frame to suspend your backups for a certain period, once the schedule limit ends, the backups will resume automatically.

Email Notification: Enable email notifications to get alerts on the actual status of the configured backups (like success, failure, missed, etc.)
